

MIDI EXCAVATORS

Also available with STAGE 3A engine.

Concrete solutions. Always.

85SB
90ZT
95UR
100TR

Operating weight 8.300 - 8.620 kg
Engine Power 53,7 kW - 73,0 HP

Operating weight 9.000 - 9.320 kg
Engine Power 53,7 kW - 73,0 HP

Operating weight 9.100 - 9.420 kg
Engine Power 53,7 kW - 73,0 HP

Operating weight 9.900 - 10.220 kg
Engine Power 53,7 kW - 73,0 HP

 **EUROCOMACH®**

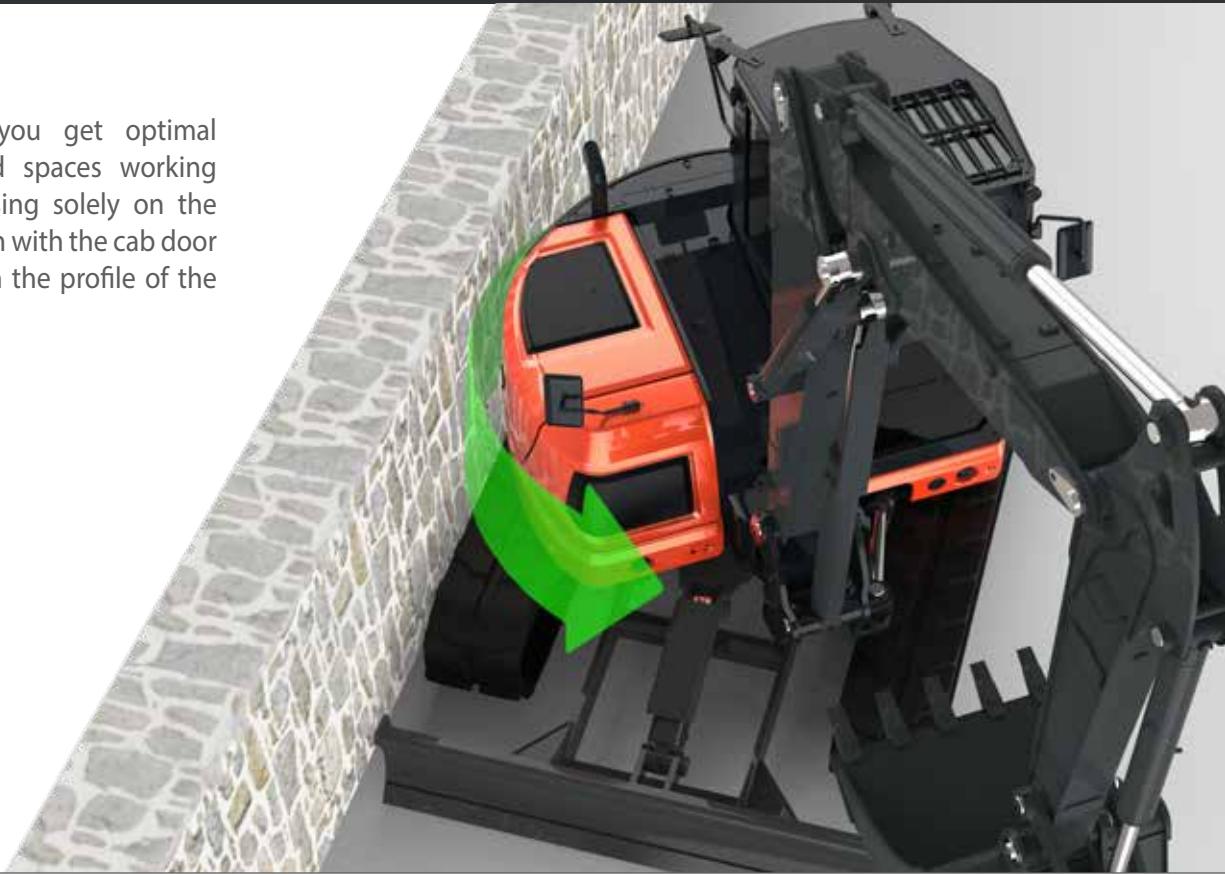

All models are equipped with a side heat engine: this allows the size of the cab to be increased. The blower fan improves engine cooling, making the cabin cooler and quieter for greater operator comfort.

LIKE THE GREATEST, JUST SMALLER.

DIMENSIONS

With zero tail swing, you get optimal performance in confined spaces working in complete safety, focusing solely on the excavation operation, even with the cab door open, as it remains within the profile of the tracks.

UNPARALLELED VERSATILITY

ZT Version
Mono boom
with swing.

TR Version
Three pieces
boom with swing.

SB Version
Monoboom
fixed cabin side.

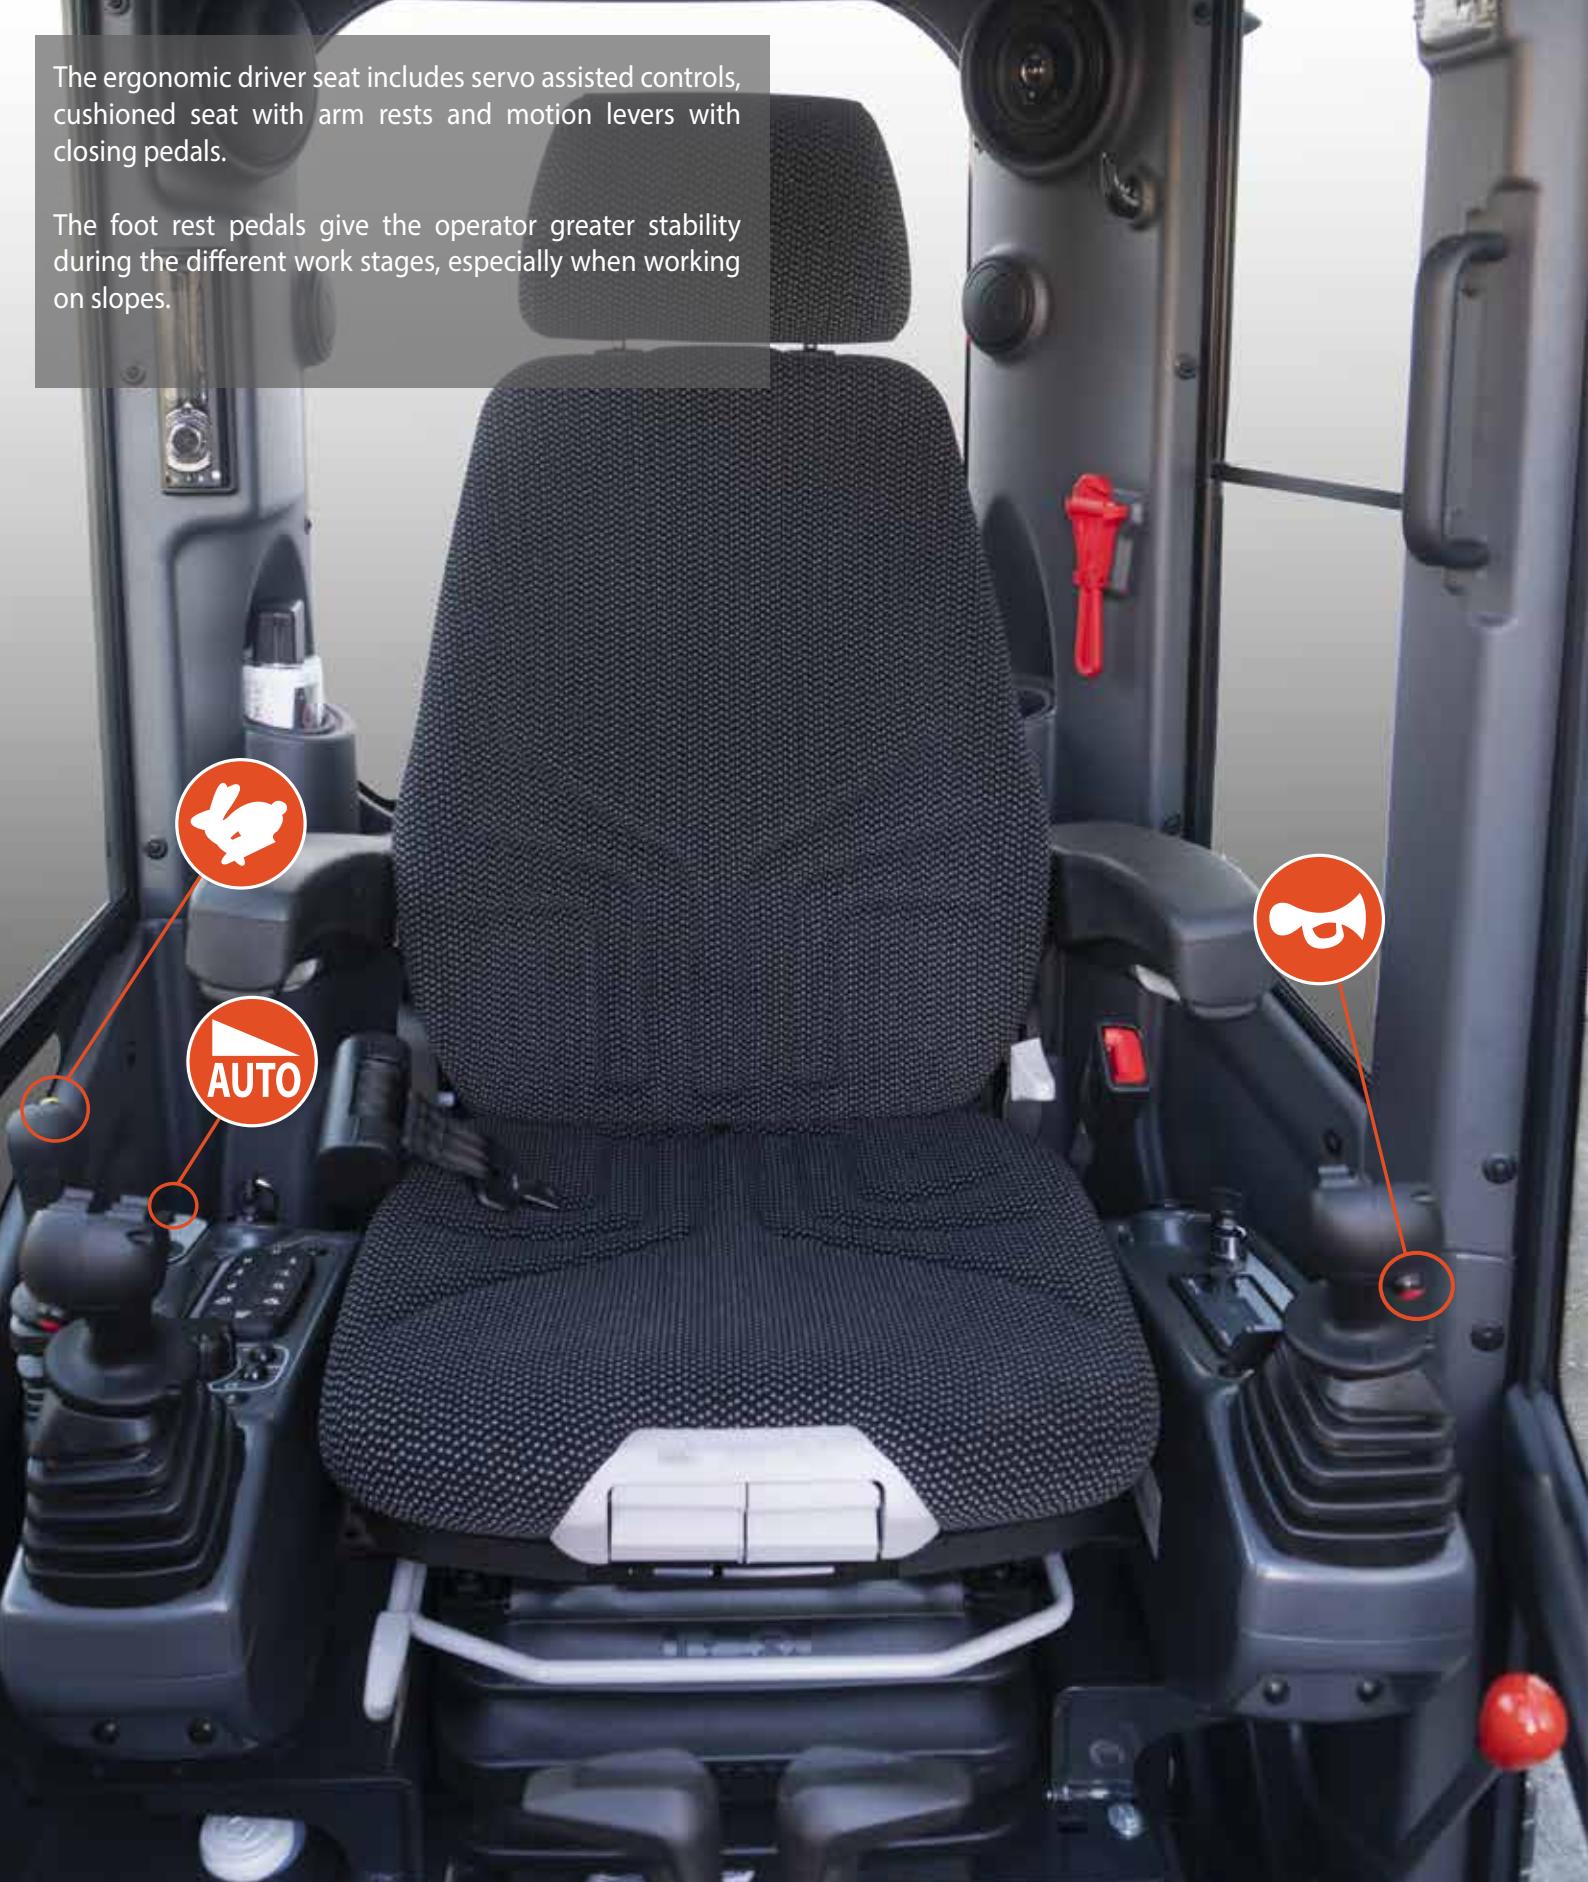

UR Version
Offset boom
fixed cabin side.

ZERO TAIL

The ergonomic driver seat includes servo assisted controls, cushioned seat with arm rests and motion levers with closing pedals.

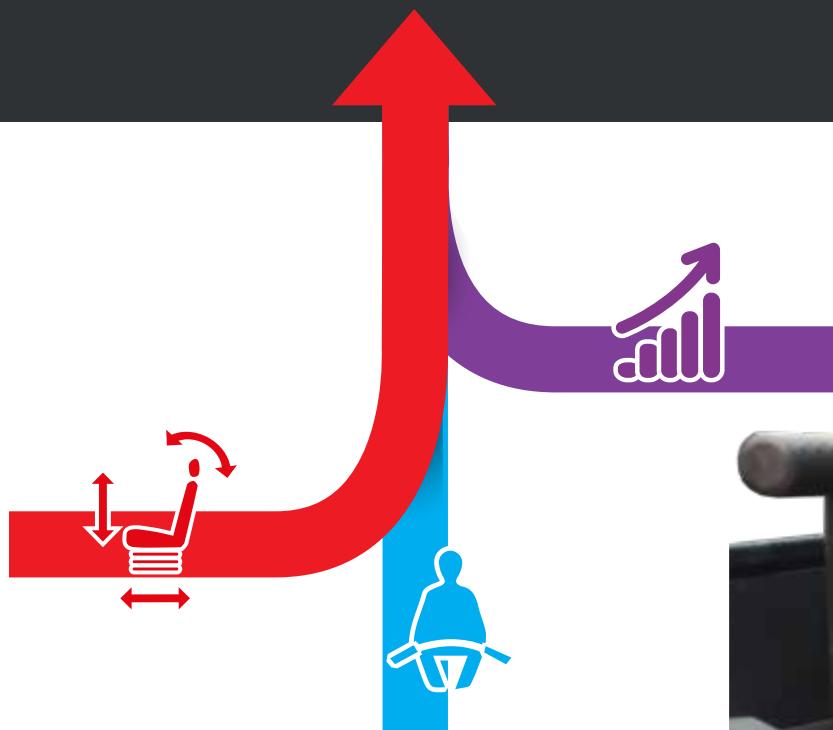

The foot rest pedals give the operator greater stability during the different work stages, especially when working on slopes.

USB RADIO

The radio is equipped with a handy USB port.

COMFORT, SAFETY AND FUNCTIONALITY: FINALLY TOGETHER.

COMMANDS AND CONTROLS

All models have two motion modes: first gear with reduced speed and high thrust force and second speed with greater transfer speed. Everything is controlled by a practical button above the backfill blade lever.

Motion can be controlled using the advancement lever and integrated folding pedals that, once closed, increase the space available to the operator and prevent accidental use.

The foot board flush with the door makes for stepless exit from the cab and facilitates floor cleaning operations. It was designed to be able to be removed easily in order to perform extraordinary maintenance.

STRAIGHT TRAVEL

In case of simultaneous control of the services and motion, the hydraulic system with variable displacement pumps simultaneously ensures the fluidity of movements and straight driving of the machine.

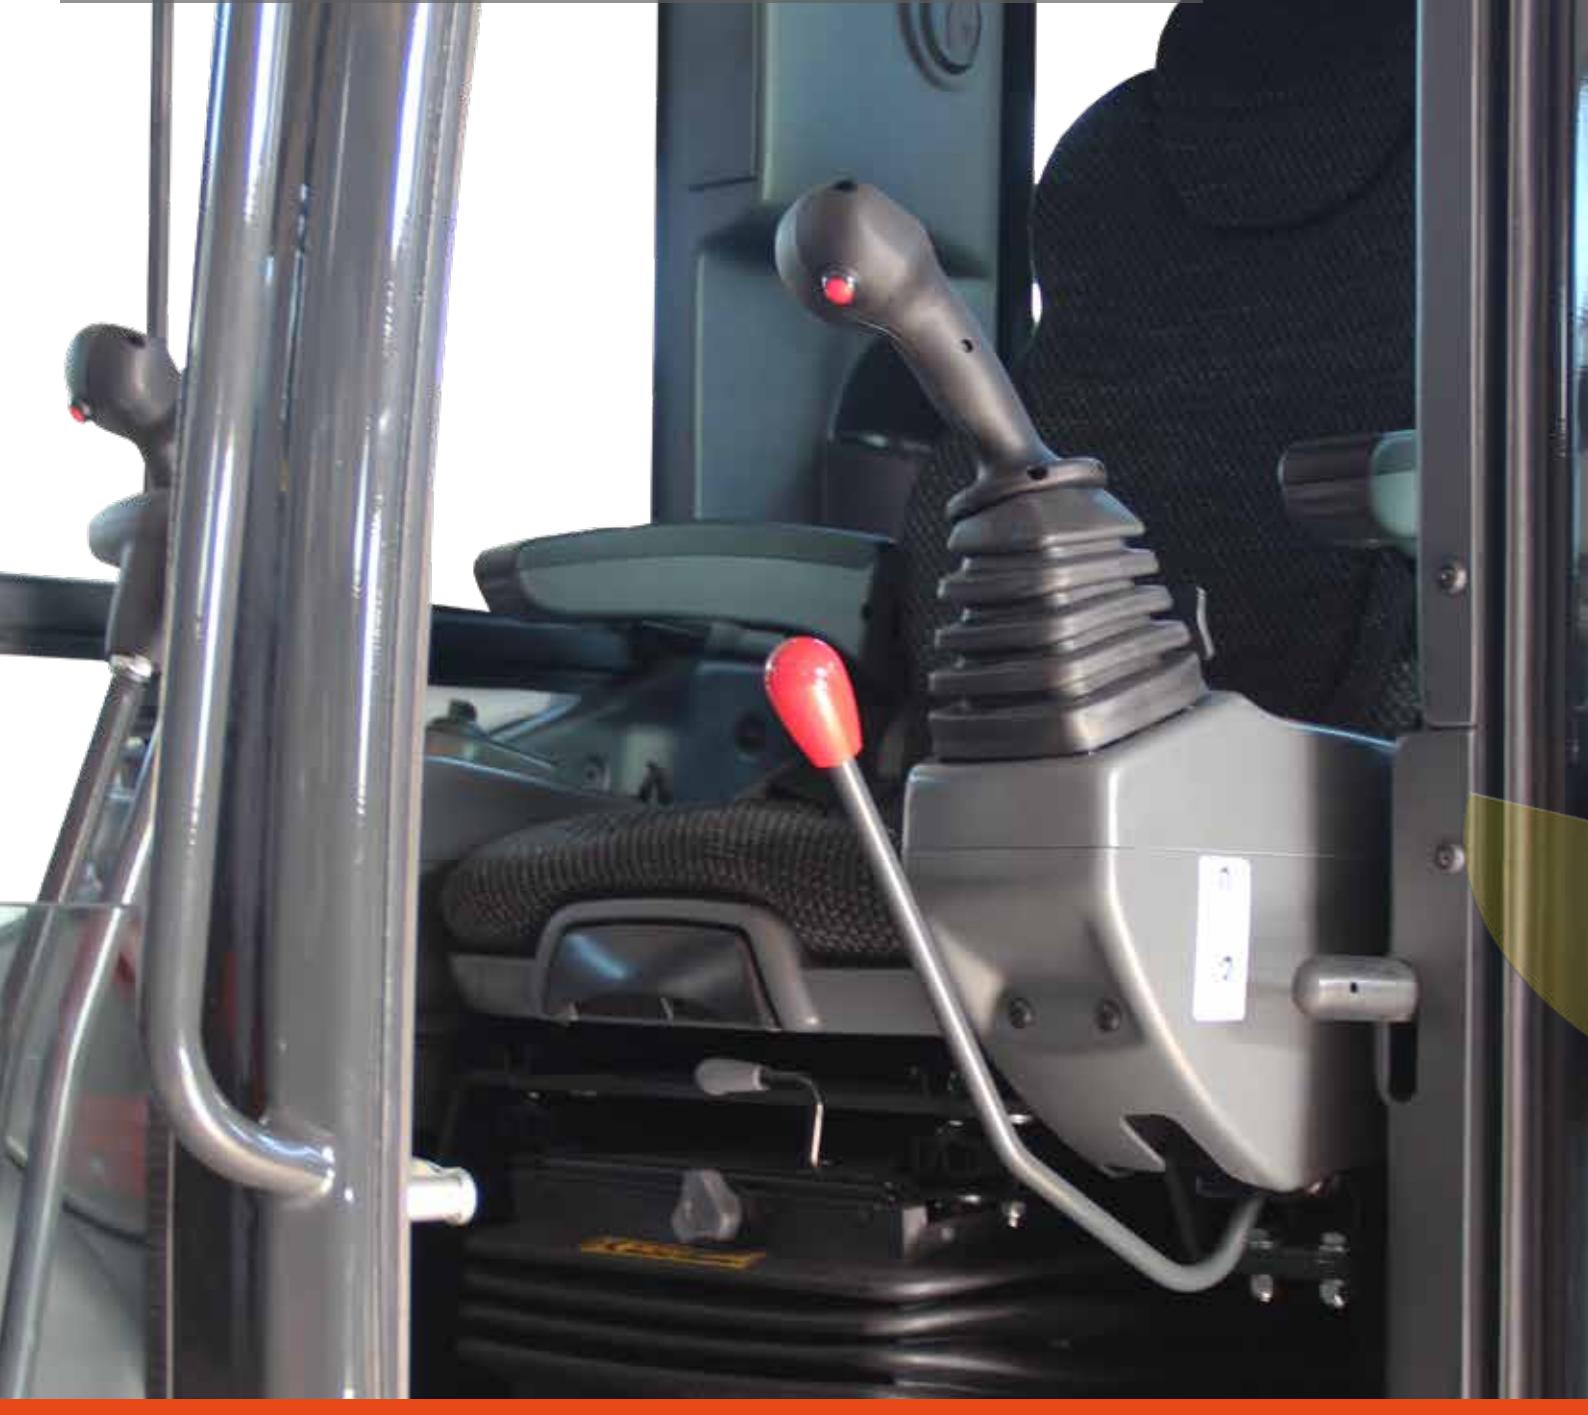

AUTO TWO SPEED

When the excavator needs more thrust force, the automatic speed transmission intervenes, reducing the motion ratio.

The cabin, with its generous interior dimensions, offers some of the best interior space in its class. The large width of the access door makes it easy to climb in and out. The front windshield with assisted lift promotes maximum visibility due to its considerable width.

The adjustable suspension seat combined with the floating cabin, adequately dampens vibrations and bumps, maximizing operator comfort.

The cab is equipped with a radio, glove compartment, USB port, courtesy light, sliding sunblind, battery charger and other practical accessories.

VISIBILITY

The special design of the body and protective structures give the operator a wide field of vision, allowing easy control of the front tracked part.

The large windshield along with the upper rear window lets the operator keep an eye on the entire work area while remaining comfortably seated.

WORK LIGHTS

Powerful lights optimize visibility even with low lighting: they are located in the lower compartments and built into or installed in the work arm.

LOAD SENSING HYDRAULIC SYSTEM.

The efficient Load Sensing system saves fuel (up to 15%) with the suitable power distribution.

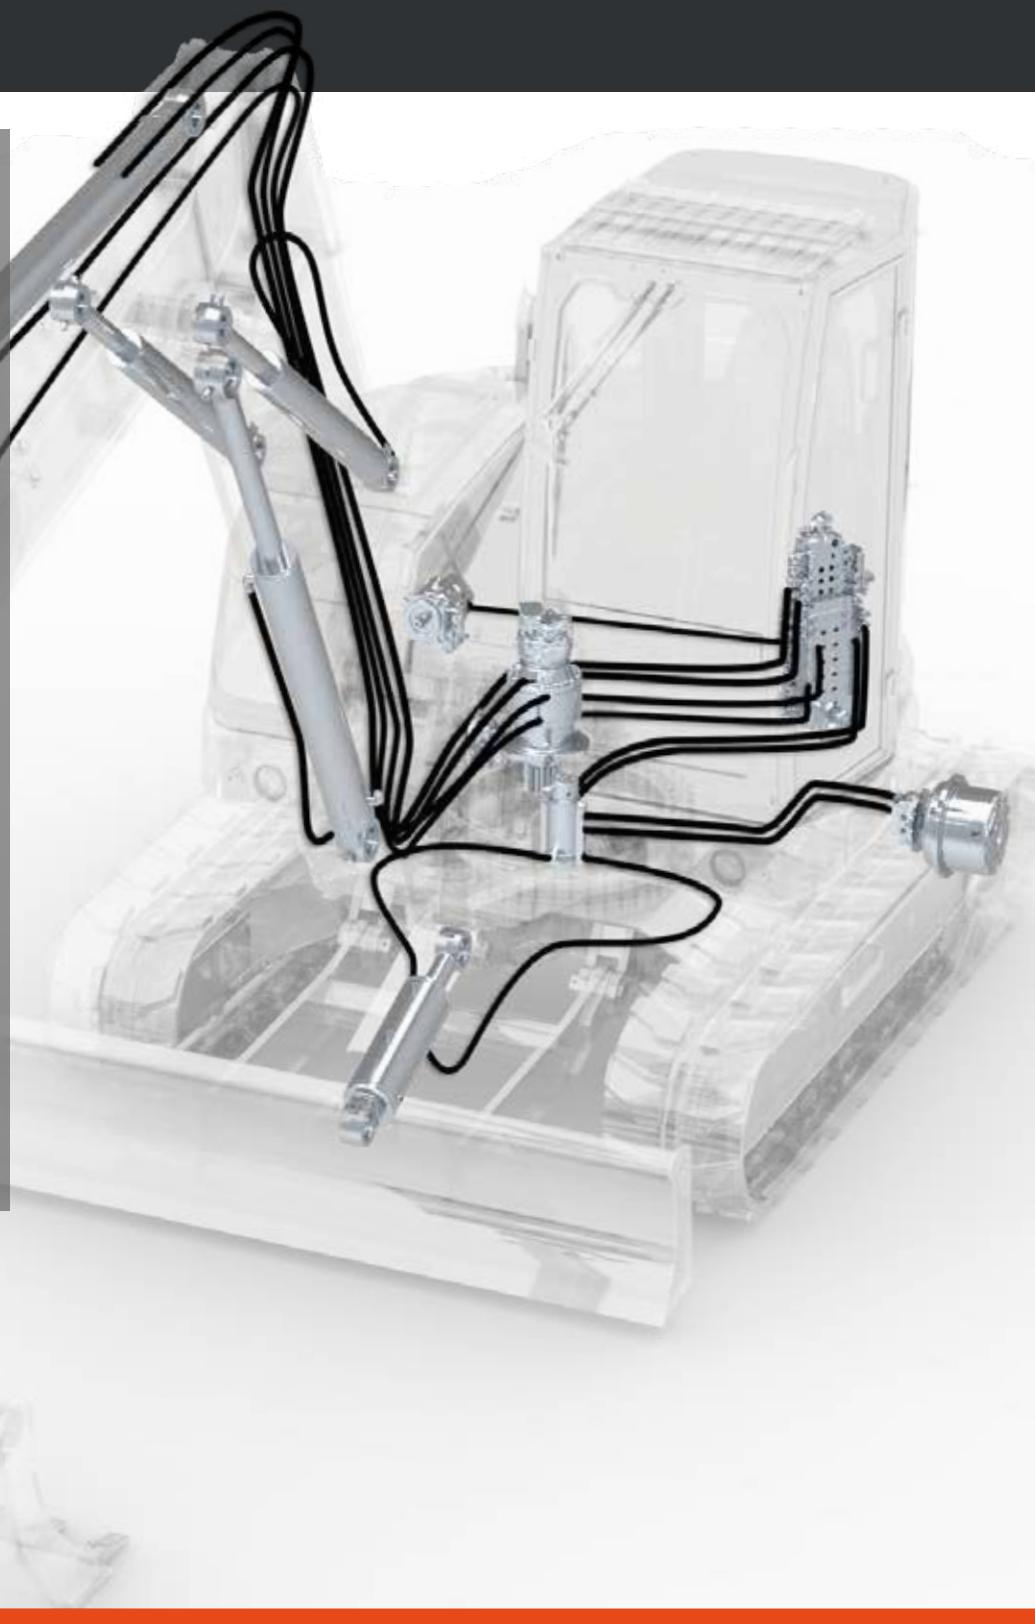

LS pump: only delivers the flow required by the system.

FLOW SHARING distributor: full simultaneous movements (all), even when the flow required exceeds the maximum pump capacity.

Optimal flow in each element thanks to the pressure compensators in each section.

High flexibility: the flow and pressure regulators provide high-speed during empty movements and high pressure while working.

Availability of various auxiliary systems with capacities from 40 up to 100 lt/min.

FLEXIBILITY, COMPACTNESS, ERGONOMICS.

The practical additional internal and external ballast (optional) can, when needed, further increase the excellent operating stability without compromising the overall size of the machine.

EFFICIENCY AND CONSUMPTION

The heart of the excavators is the efficient and silent engine, designed and built to optimize performance and reduce fuel consumption.

The long intervals between programmed maintenance contribute to economic efficiency, reducing costs and machine downtime.

The Auto-Idle automatic controls reduce the engine rpm when the hydraulic system is not in use, controlling fuel consumption.

SAFETY

Sensors monitoring the manipulator position prevent accidental control of the machine.

Safety belts, the cabin structure and rollbar with ROPS FOPS level I and TOPS certificate provide all of the safety needed in the cab in the event of an accident.

OPTIONAL COUNTERWEIGHT

The SB version, with fixed boom on side of the cabin has been conceived following the design of big size excavators: this gives great robustness and reliability to the machine.

TRANSPORT WITHOUT LIMITS.

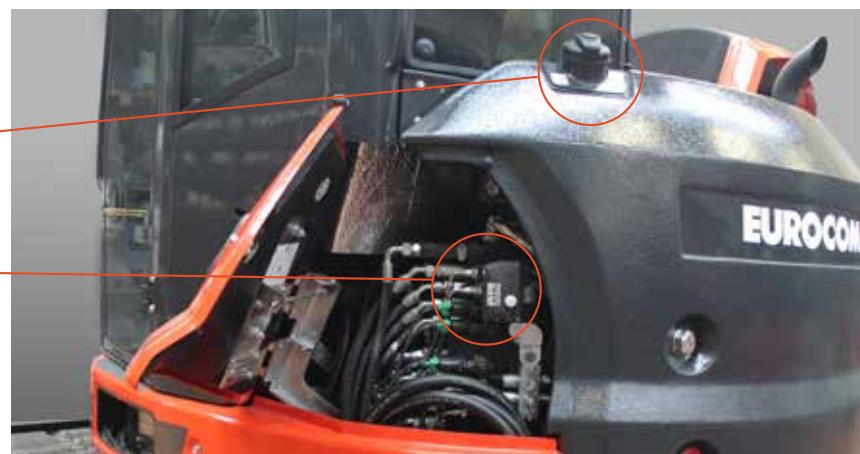

Careful and scrupulous design means all of the models in the category have optimal dimensions for loading in 40' High Cube containers.

2560 mm

Easy routine maintenance simplifies service operations.

The side compartment allows quick access to the electronic pump to refill the fuel and to the hydraulic distributor.

Services related to the heat engine are easily reached through a wide opening and the side compartment. All the filters (fuel, oil and air) in addition to checking and topping up the engine oil, are easily identified on the side.

It is simple and easy to clean all of the radiators thanks to the front compartment opening.

There is a large, locking tool compartment available to the operator.

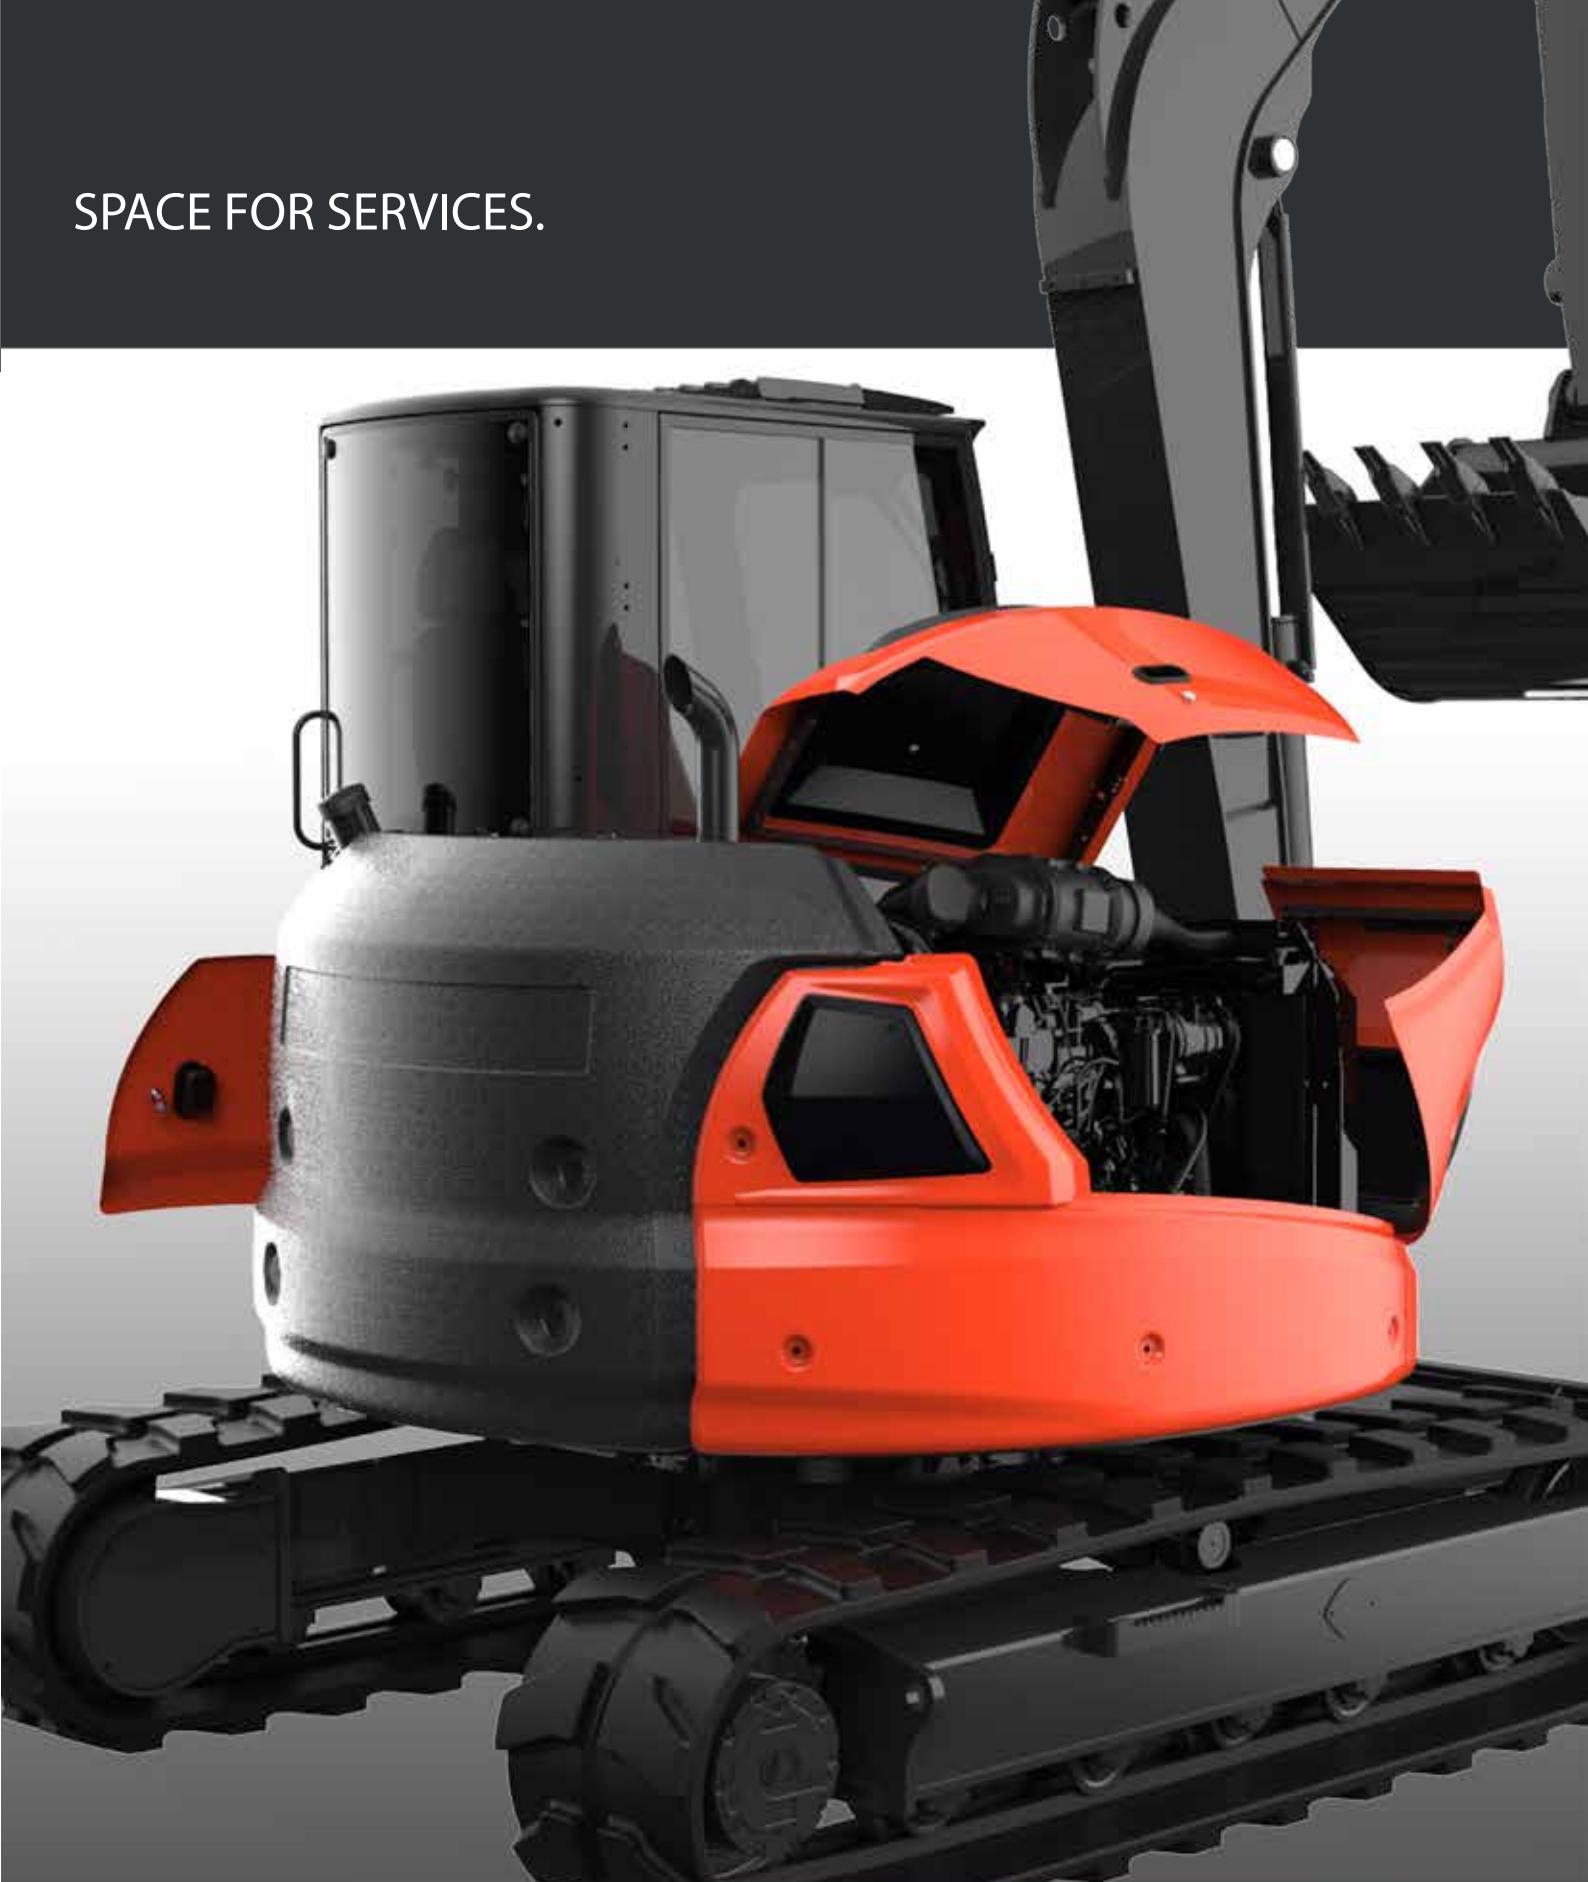

All access points for daily checks and for routine maintenance are concentrated in defined areas, optimizing machine downtime.

ACCESSIBILITY

Common or dedicated access areas make every maintenance operation quick and easy.

SPACE FOR SERVICES.

THE IMPORTANCE OF BEING RELIABLE.

RELIABILITY

Designed and tested for high performance with continuous reliability.

The definition of the materials, the selection of components and design of the structures were created to exceed the most stressful and harsh work tests.

Standing out among these are the rotation column in fusion, the protections on the lifting cylinder and the steel blade and bonnets that increase efficiency and life of the product.

PERFORMANCE

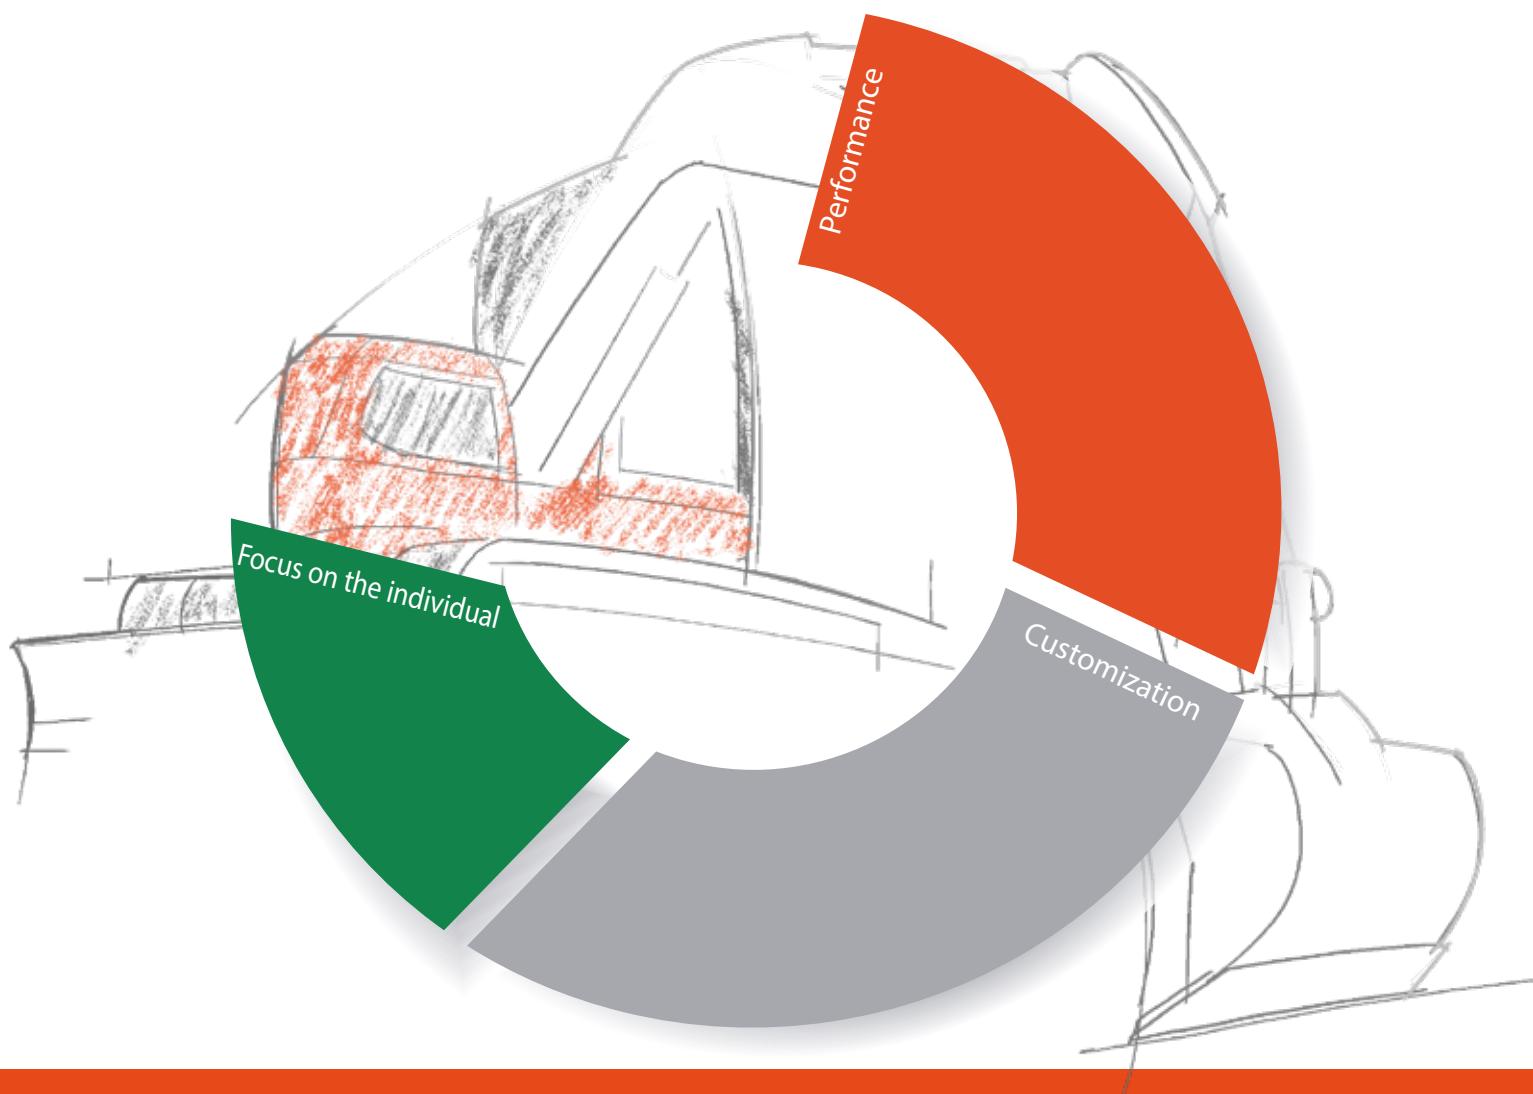

EUROCOMACH CONFIGURATION SUPPORT (ECS): ENDLESS POSSIBILITIES OF CUSTOMIZATION.

UTILITIES AND SERVICES

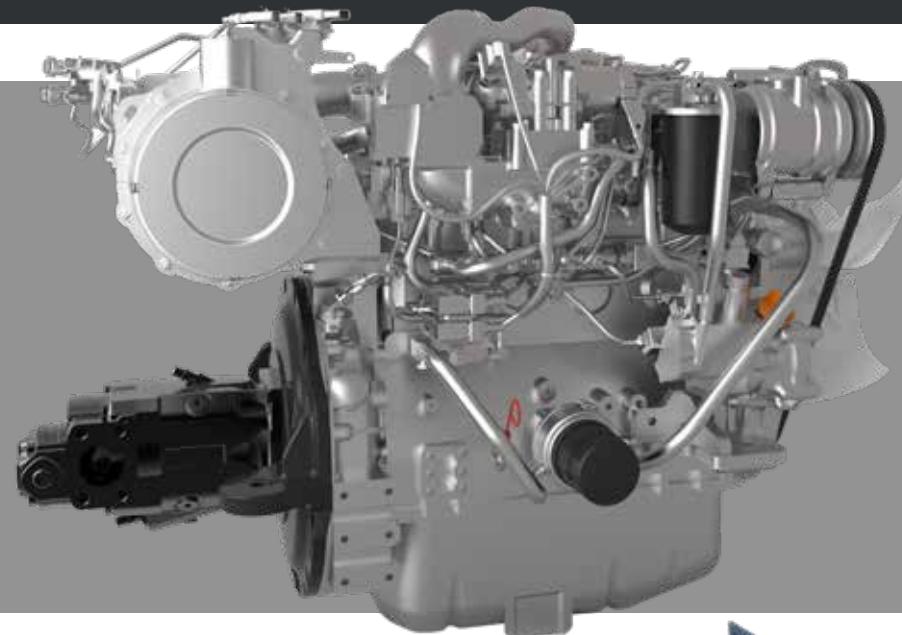

We listen to all your needs so we can propose the best possible machine solution. We consider our products to be not only simple machines but the best opportunity for our clients. Among the services provided, the following are available:

- Customized paint
- Various types of tracks
- Auxiliary line hookups customized by type and quantity
- Additional equipment

The many configurations available allow you to make the best choice in relation to the work to be performed.

THE NEW ENGINE STAGE V.

TURBO engine: YANMAR 4TNV98CT - STAGE 5
with EGR, Common Rail and filter DPF
Power: 53.7 kw / 73 HP @ 2200 rpm
Displacement: 3.319 cc
No. cylinders: 4

These are the main advantages of the side diesel engine:

- heating reduction (suction fan)
- noise reduction in cab
- heat reduction in cab
- cab size increased

In compliance with the current standards for reduction of exhaust emissions, the heat engine is equipped with two exhaust post-treatment systems: DPF particulate filter and DOC oxidation catalyst.

The regeneration system that cleans the DPF starts working automatically but may be disabled during use in areas with a risk of fire.

EVERY CONTROL IS IN YOUR HANDS.

The commands for swing, three pieces boom in the TR version, the offset boom in the UR version and all the auxiliary hydraulic lines are all controlled through comfortable and precise electrohydraulic proportional rollers on the joysticks.

The intuitive digital air conditioning instruments allows work in the most comfortable conditions with automatic setting of the internal temperature. Air distribution is guaranteed by the powerful conditioner combined with 6 nozzles located in various spots in the cab.

All switches are built into the ergonomic keypad located on the right of the console.

The operator can easily interact with the TFT monitor using two simple buttons and the convenient navigation selector.

NEW CONTROL, SAME COMFORT.

7" TFT ACTIVE MATRIX DISPLAY

The multifunction display allows the operator to view the machine status and choose the various use configurations using intuitive commands.

- Hours and maintenance control
- Engine RPM
- Operating pressure (service)
- Anomalies
- Ability to navigate through the various pages to set the capacity of the auxiliary hydraulic systems

MANAGEMENT MODE

Electronic control of the LS and torque based on the work mode selected (Economy, Standard, Power).

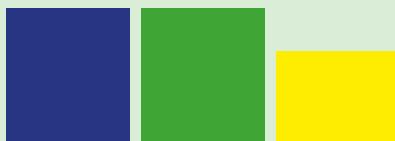

ECONOMY

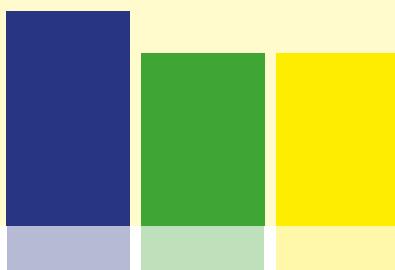

Engine Speed: fixed at 2000 rpm
Torque and Pressure: Low
Fuel consumption: low
Use: Precision and not overly heavy work

STANDARD

Engine: variable speed
LS torque and pressure differential: standard
Fuel consumption: standard
Normal use of the machine

POWER

Engine: variable speed
LS torque and pressure differential: high
Fuel consumption: high
Excellent performance and high productivity

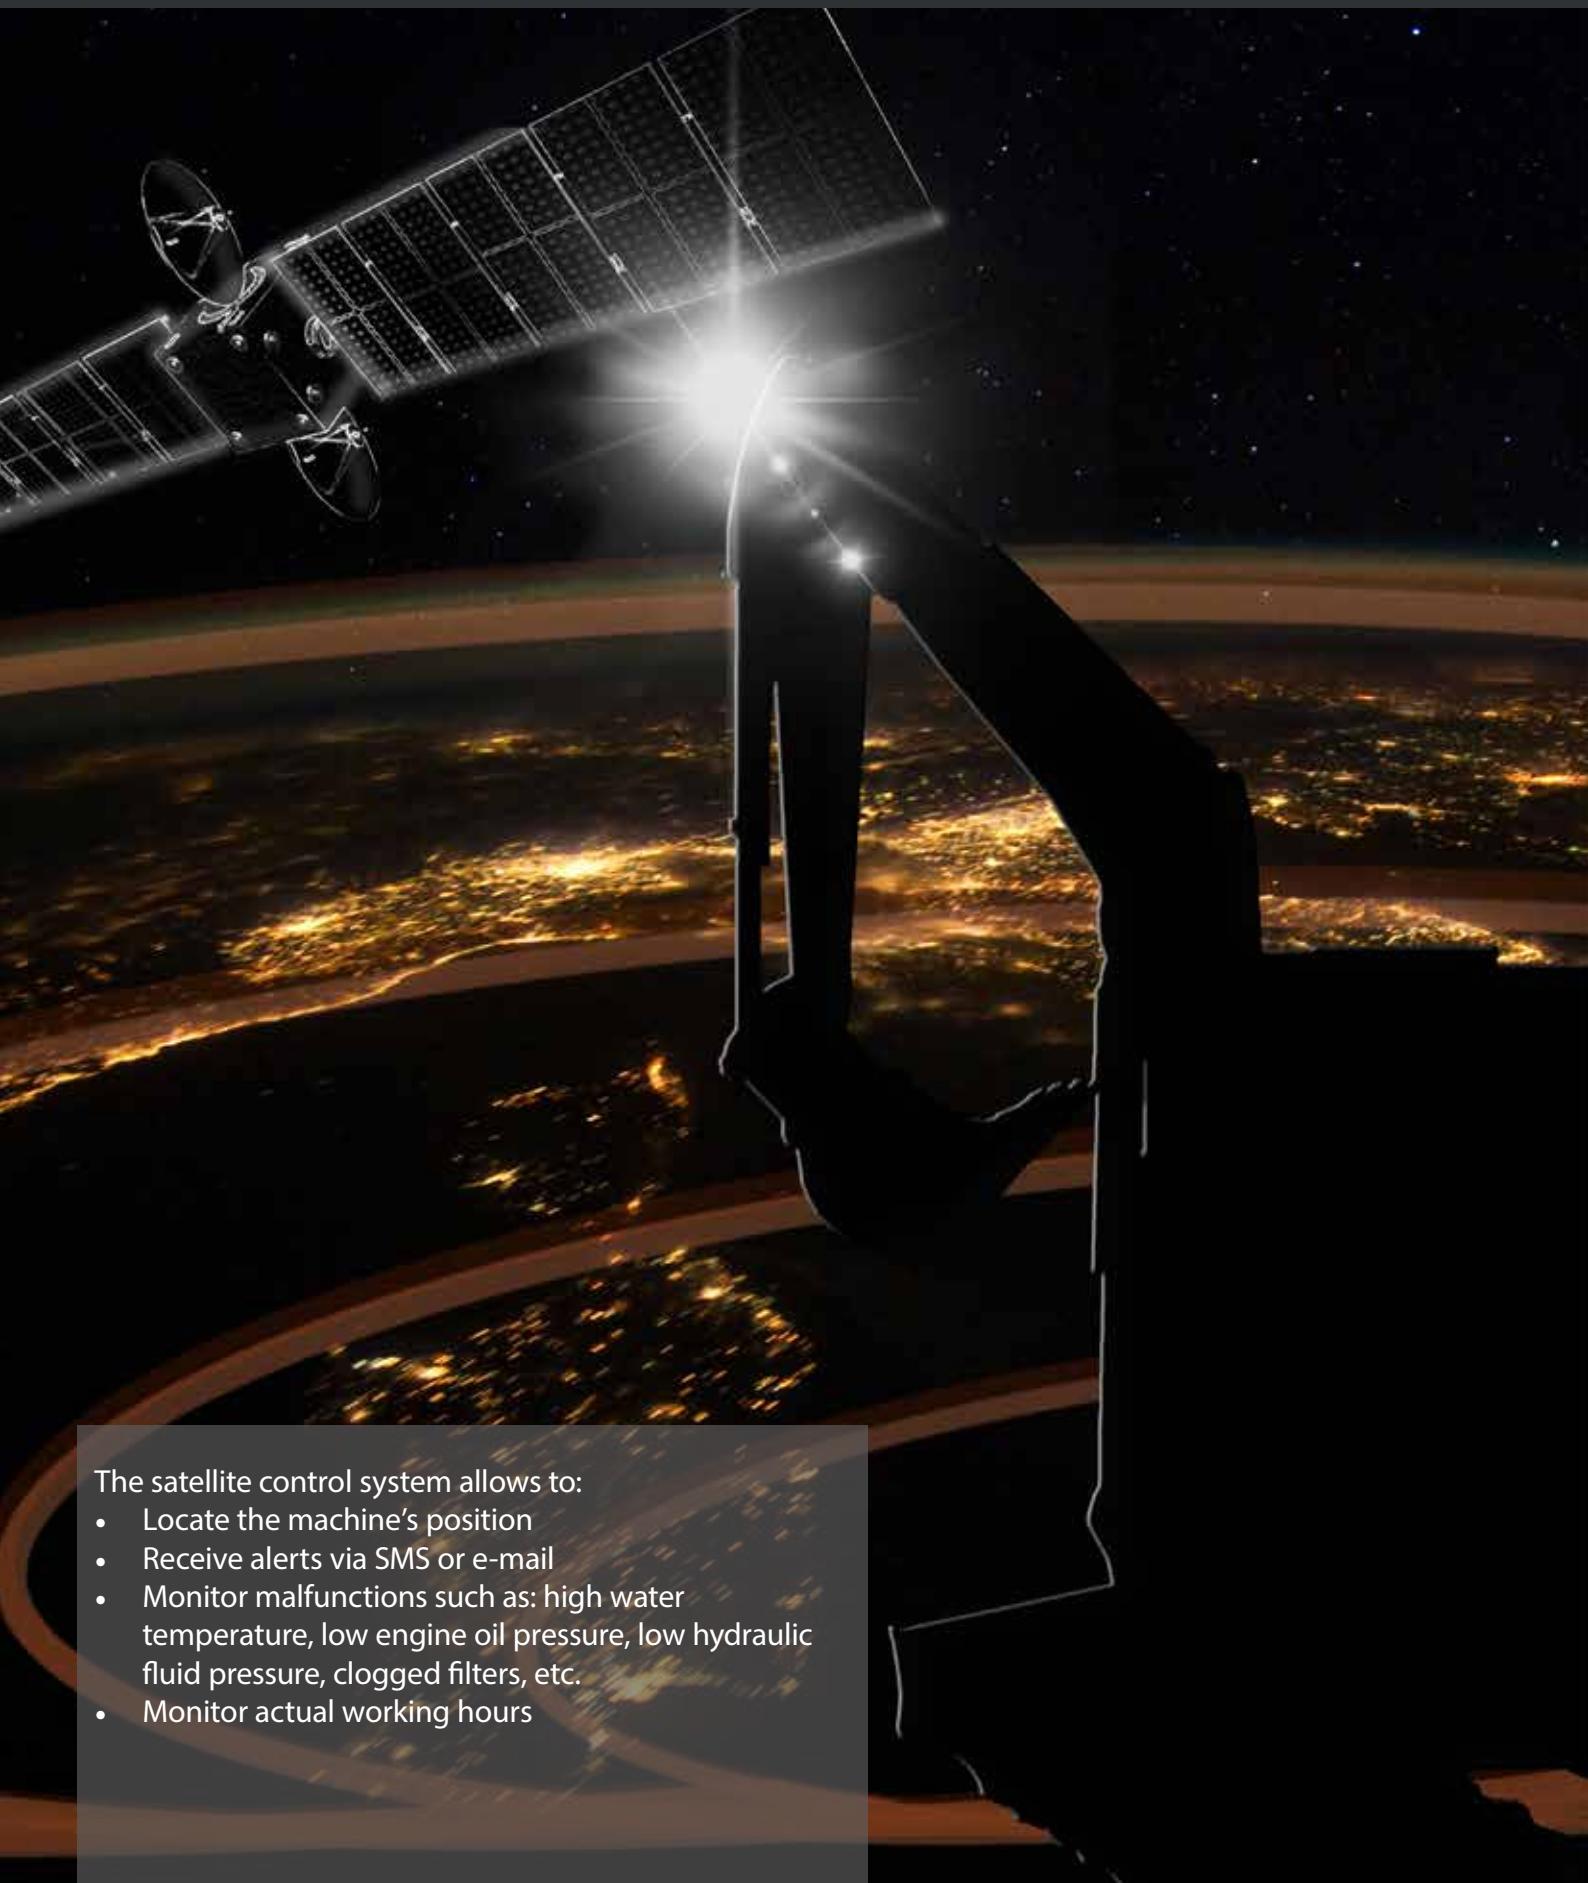

TR VERSION.

The TR version is equipped with a three pieces boom that offers a longer extension and greater return: this facilitates excavation operations near the machine and makes loading operations easier.

EUROCOMACH GEO-SERVICE.

The satellite control system allows to:

- Locate the machine's position
- Receive alerts via SMS or e-mail
- Monitor malfunctions such as: high water temperature, low engine oil pressure, low hydraulic fluid pressure, clogged filters, etc.
- Monitor actual working hours

OPTIONALS.

The wide range of equipment especially designed for Eurocomach mini excavators ensures the most appropriate use of the machine, maximizing performance.

A complete offer of optional fittings ensures the best performance.

Certified and tested lifting hook with blocking valves with CE certification for material handling equipment

Customized paint

Additional front and rear protective grills with FOPS level II certification

Hydraulic preparation for mulcher with additional pump (max. 57 lt/min, maximum pressure 180 bar) complete with: external air conditioning system condenser and blowing fan.

Auxiliary circuit main high flow with latch AUX 1 (simple or double effect)	electroproportional switch on right joystick	
Auxiliary circuit AUX 2 (double effect)	electroproportional switch on right joystick	
Auxiliary circuit low flow AUX 3 (double effect)	electroproportional switch on left joystick	

TECHNICALS SPECIFICATIONS

Operating weight (with rubber tracks)	kg	9.100
Operating weight (with steel tracks)	kg	9.420
Travelling speed (AUTO TWO SPEED)	km/h	1 ^a : 0 ÷ 2,6 / 2 ^a : 0 ÷ 5,2
Slew speed	rpm	10
ENGINE		
Type	YANMAR 4TNV98CT - STAGE V	
Max Power (2.100 rpm)	kW - HP	53,7 - 73,0
Displacement	cc	3.319
Number of cylinders	n°	4
Cooling	Liquid	
Consumption	lt/h	9,3
Alternator	V (A)	12 (80)
Battery	V (Ah)	12 (100/900)
HYDRAULIC SYSTEM		
Circuit Type	Load Sensing system with "Flow Sharing" control valve with 11 elements	
Pump type	1 LS hydraulic variable pump with electronic control + 1 gear pump	
Pump displacement	cc	84 + 9
Pump capacity	lt/min	185 + 20
Max. circuit calibration pressure	bar	290 - 200 - 35
Auxiliary Flow (max pressure):	lt/min (bar)	
AUX 1 main high flow simple or double effect		100 / 100 (200)
AUX 2 double effect		90 / 80 (290)
AUX 3 double effect		50 / 50 (290)
PERFORMANCES		
Max digging depth standard arm (optional arm)	mm	4.220 (4.570)
Max dumping height with cab standard arm (optional arm)	mm	5.450 (5.670)
Bucket breaking force (standard arm) ISO 6015	daN	5.850
Arm breaking force (standard arm) ISO 6015	daN	4.350
Traction force	daN	7.960
Ground bearing pressure with rubber tracks and canopy	kg/cm ²	0,45
Max slope	60% - 30°	
DIMENSIONS		
Maximum width	mm	2.320
Total height	mm	2.560
Rear rotation radius	mm	1.155
Digging arm length std (optional)	mm	1.760 (2.110)
Tracks width	mm	450
Rollers number (for each side)	n°	5/1(rubber track) 6/1 (steel track)
FILLINGS		
Fuel tank	lt	105
Hydraulic oil tank	lt	90
Hydraulic circuit capacity	lt	120
Cooling system capacity	lt	25
Engine oil	lt	10
CONTROLS		
Boom, dipper stick, bucket and turret swing	2 pilot joysticks	
Track movements (included counter rotation)	2 pilot levers	
Dozer blade	pilot lever	
Auxiliary circuit main high flow with latch AUX 1 (simple or double effect)	electroproportional switch on right joystick	
Auxiliary circuit AUX 2 (double effect)	electroproportional switch on right joystick	
Auxiliary circuit low flow AUX 3 (double effect)	electroproportional switch on left joystick	
Offset	electroproportional switch on left joystick

LIFTING CAPACITY

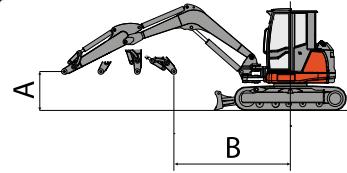

The lifting capacity is based on ISO 10567 and does not exceed 75% of the static tipping load or 87% of the hydraulic lifting capacity of the machine.

The straddle refers to the centre of rotation.

* Indicates the hydraulic load limit.

0 m refers to ground level.

The machine is understood to be equipped with a cab, rubber tracks, without a bucket and without a quick coupling.

LIFTING CAPACITY

The lifting capacity is based on ISO 10567 and does not exceed 75% of the static tipping load or 87% of the hydraulic lifting capacity of the machine.

The straddle refers to the centre of rotation.

* Indicates the hydraulic load limit.

0 m refers to ground level.

The machine is understood to be equipped with a cab, rubber tracks, without a bucket and without a quick coupling.
